Why are tissues important - answers.com

The adjustment of the subluxation to release pressure upon nerves, to restore mental impulse flow, to restore health, is big enough to rebuild the thoughts and actions of the world. ~ B.J. Palmer, The Big Idea

The Nervous System: Transmitter of Life - Los Angeles ...

It is a body tissue that has the ability to contract. It shortens and generates force. It relaxes and returns to its original length. Muscles move joints, stabilize the body, move air and food through the organs, act as valves for bladder, bowel and other organs. They control movement of the eyes. They help us express ourselves by changing the shape of our faces (smile, frown, etc).
