### No Solution In Algebra

We're asked to use the drop-downs to form a linear equation with no solutions. So a linear equation with no solutions is going to be one where I don't care how you manipulate it, the thing on the left can never be equal to the thing on the right. And so let's see what options they give us. One, they ...

### IXL - Find the number of solutions (Algebra 1 practice)

The first case is the case of infinite solutions, when all numbers are solutions. The next case is no solutions, when we have no answer. We can identify which case it is by looking at our results. If we end up with the same term on both sides of the equal sign, such as  $4 = 4$  or  $4x = 4x$ , then we have infinite solutions.
