Flexible Deployments from Edge to Core to Cloud Manage data consistently across your hybrid cloud. ONTAP software provides the rock-solid foundation for data management on the broadest

range of deployment options—from engineered systems to commodity servers to the cloud.

ONTAP Data Management Software | NetApp

Introduction. Flow-based programming defines applications using the metaphor of a "data factory". It views an application not as a single, sequential process, which starts at a point in time, and then does one thing at a time until it is finished, but as a network of asynchronous processes communicating by means of streams of structured data chunks, called "information packets" (IPs).

Flow-based programming - Wikipedia

Communications-based train control (CBTC) is a railway signaling system that makes use of the telecommunications between the train and track equipment for the traffic management and infrastructure control. By means of the CBTC systems, the exact position of a train is known more accurately than with the traditional signaling systems.
