Sections 14-16: The Order Topology, The Product Topology on , The Subspace Topology. 1. Show that if A is a subspace of X , and B is a subset of A , then the topology inherits as a subspace of X is the same as the topology it inherits as a subspace of A . If A is open in X relative to B , then there exists an open set U in X such that $A \cap U = B$. Also, because A is open in X , there exists open V in X such that $A \cap V = B$.

Munkres: Chapter 2, Sections 14-16 | jesterpo

Example 3, from Munkres, established that \mathbb{Q} is countable. Note that \mathbb{Q} is countably infinite. This follows from Theorem 7.6 (finite products of countable sets are countable). Define f by if $x = p/q$, if $x = 0$, and if $x = -p/q$. This map is clearly injective. Equivalently, we conclude that \mathbb{Q} is countable (Theorem 7.1: Equivalent Conditions of Countable Sets). 4.
