Various computer display standards or display modes have been used in the history of the personal computer. They are often a combination of aspect ratio (specified as width-to-height ratio), display resolution (specified as the width and height in pixels), color depth (measured in bits per pixel), and refresh rate (expressed in hertz). Associated with the screen resolution and refresh rate is a ...

Optimum HDTV viewing distance is the distance that provides the viewer with the optimum immersive visual HDTV experience.. Although opinions vary on the exact screen size to distance relationship, formal research and recommendations suggest closer is preferred to farther [not in citation given], to provide a more immersive experience. How close?

One of the most important decisions you have to make when buying a new TV is to choose among the available flat screen TV sizes. The diagonal screen size has a big impact on the price and, if you're replacing an old TV, the wide screen measurements are different.

### **What Flat Screen TV Sizes Are Right For You? - Digital Landing**

The perceived "visual density" of a screen—and thus the amount of anti-aliasing possibly needed to make computer graphics look convincing and smooth—is dependent on the pixel density of the screen (the "ppi") and the distance from the user's eyes. Adjust values below to calculate the visual density, or select a different value to control and instead enter the desired ppd.

I want to watch an SD video on my HD TV, but the image shows a little unclear and the size is too small to fit the screen. I don't know whether it is due to the low quality resolution or other causes.

### **How to Convert a Normal Video to HD Quality - Apowersoft**

On-screen Show (16:9) sets the slide dimensions to 10 in x 5.625 in. Widescreen sets it to 13.333 in x 7.5 in.. Both of these options are the same aspect ratio so they will look the same in Normal View, since PowerPoint automatically adjusts the zoom level. Widescreen (13.333 in x 7.5 in.) provides more slide surface area for the content, so that is the best choice for presentations.

### **Change the size of your slides - Office Support**

(In Windows 7, right-click on your desktop and click Screen Resolution. Click Make text and other items larger or smaller for a roughly equivalent setting: DPI.). This setting changes the size of everything, including text. For comparison, here are 150% (the default/recommended setting for my display) and 250% side by side (click the image for the larger or full-sized version).

### **How Can I Make the Text on My Screen Larger? - Ask Leo!**

Open Screen Resolution by clicking the Start button , clicking Control Panel, and then, under Appearance and Personalization, clicking Adjust screen resolution.. Choose one of the following: Smaller - 100% (default). This keeps text and other items at normal size. Medium - 125%.
