MICROEVOLUTION TO MACROEVOLUTION Presenting the Concept by Larry Flammer BACKGROUND Microevolution is a term often applied to the process whereby a species (or a population) undergoes significant changes over time, such that certain new traits or groups of traits characterize the group sufficiently that

### MICROEVOLUTION TO MACROEVOLUTION

Microevolution occurs when there are changes in gene frequency within a population over a short period of time. Microevolution specifically refers to changes within a population, a population being a group of organisms that breed with each other. Microevolution differs from macroevolution in scale.
