Marine Biology Peter Castro

Marine aquaculture presents an opportunity for increasing seafood production in the face of growing demand for marine protein and limited scope for expanding wild fishery harvests. However, the ...

Mapping the global potential for marine aquaculture ...

The environmental impact of fishing includes issues such as the availability of fish, overfishing, fisheries, and fisheries management; as well as the impact of fishing on other elements of the environment, such as by-catch. These issues are part of marine conservation, and are addressed in fisheries science programs. There is a growing gap between the supply of fish and demand, due in part to ...

Environmental impact of fishing - Wikipedia

Mangrove swamps (mangals) are found in tropical and subtropical tidal areas. Areas where mangals occur include estuaries and marine shorelines.. The intertidal existence to which these trees are adapted represents the major limitation to the number of species able to thrive in their habitat. High tide brings in salt water, and when the tide recedes, solar evaporation of the seawater in the ...
