This Is Your Brain. This Is Your Brain On Music. It wasn't a laboratory, but in the offices of Harmony Project in Los Angeles. It's a nonprofit after-school program that teaches music to children in low-income communities. Two nights a week, neuroscience and musical learning meet at Harmony's Hollywood headquarters,...

This Is Your Brain. This Is Your Brain On Music - NPR.org

How Brains See Music as Language. During a spoken conversation, the brain is busy processing the structure and syntax of language, as well the semantics or meaning of the words. But Limb and his colleagues found that brain areas linked to meaning shut down during improvisational jazz interactions. In other words, this kind of music is syntactic but it's not semantic.

How Brains See Music as Language - The Atlantic

The Relationship between Music and Language. Traditionally, music and language have been treated as different psychological faculties. This duality is reflected in older theories about the

lateralization of speech and music in that speech functions were thought to be localized in the left and music functions in the right-hemisphere of the brain.
