Mars is the focus of much scientific study about possible human colonization. Mars's surface conditions and past presence of liquid water make it arguably the most hospitable planet in the Solar System besides Earth. Other than Venus, Mars requires less energy per unit mass to reach from Earth than any planet.. Permanent human habitation on other planets, including Mars, is one of science ...

### **Colonization of Mars - Wikipedia**

Fictional representations of Mars have been popular for over a century. Interest in Mars has been stimulated by the planet's dramatic red color, by early scientific speculations that its surface conditions might be capable of supporting life, and by the possibility that Mars could be colonized by humans in the future. Almost as popular as stories about Mars are stories about Martians engaging ...

Of main interests to us is the use of mining as a part of in-situ resource utilization, that is: making it easier to industrialize and colonize space by removing the need to pay the sky-high delta-V cost of lugging raw materials up Terra's gravity well.. But in the early stages, asteroid mining start-ups cannot be established to provide minerals to space industrialization because there won't ...
