Newspapers across the United States carried headlines similar to that of The Cincinnati Post: "Key Ingredients for Life Found in Universe," with the byline "Chemistry Happens Around Distant Stars."

### **Chemistry | Answers in Genesis**

Genetic engineering is a process that alters the genetic structure of an organism by either removing or introducing DNA. Unlike traditional animal and plant breeding, which involves doing multiple crosses and then selecting for the organism with the desired phenotype, genetic engineering takes the gene directly from one organism and inserts it in the other.

### **Genetic engineering - Wikipedia**

This course deals with a subject of importance to us all – our genes, which is an area at the forefront of developments in medical science. You'll examine the patterns of inheritance of genes, how genes function and why there are differences between individuals and between populations.
