Sections 12,13: Topological Spaces, Basis for a Topology. 1. Let X be a topological space; let A be a subset of X . Suppose that for each $x \in A$ there is an open set containing x such that $A \cap U$ is open in U . By assumption, for any $x \in A$ there exists an open set containing x such that $A \cap U$ is open in U . Hence, A is a union of open sets which implies that A is open. 2. Consider the nine topologies on indicated in Example 1.
