Carla S. Wilson, MD, PhD, professor of hematopathology, and Devon S. Chabot-Richards, MD, associate professor of hematopathology and molecular pathology, Department of Pathology, University of New Mexico School of Medicine, presented seven of their cases illustrating the challenges of peripheral blood smear evaluation, three of which are reported on here (with others to be published in April).

Practical challenges in peripheral blood smear evaluation ...

The domestic dog (*Canis lupus familiaris* when considered a subspecies of the wolf or *Canis familiaris* when considered a distinct species) is a member of the genus *Canis* (canines), which forms part of the wolf-like canids, and is the most widely abundant terrestrial carnivore. The dog and the extant gray wolf are sister taxa as modern wolves are not closely related to the wolves that were first ...

Breaking News for 2006 - Gerontology Research Group

Helicobacter pylori, previously known as *Campylobacter pylori*, is a Gram-negative, microaerophilic bacterium usually found in the stomach. It was identified in 1982 by Australian scientists Barry Marshall and Robin Warren, who found that it was present in a person with chronic gastritis and gastric ulcers, conditions not previously believed to have a microbial cause.

From Melnick et al (1090). AA a Increased compared with chamber controls (0ppm), $p < 0.05$ mm based on logistic regression analysis.. c Mortality adjusted tumor rates are adjusted for competing causes of mortality, such as death due to other tumors, whose rates differ by exposure group.. Activated Oncogenes. The presence of activated oncogenes in the exposed groups which differ from those seen in ...

Occupational Safety and Health Administration

I had migraines for well over 20 years. I am not alone; about 12% of the US population has migraines. Initially, I thought I had headaches but my “headaches” were accompanied by symptoms that are not normally part of headaches: anxiety, IBS, RLS, nausea, sensitivity to

darkness, light, smells, and everything seemed irritating. I learned later that these symptoms are part of prodrome; a sort ...

This method of stimulating sweating did not become popular and we heard of one serious reaction with the method. The details of the methods used in the study were criticised by di Sant'Agnese as a different dose of mecholyl was used in the different age groups and this may have affected the rate of sweating which would influence the concentration of electrolytes (also Simmonds EJ, et al ...
