The Nine Solution Problem - Scribd

The Nine-Bottle Challenge Name_____ Background: Almost all salts ("salt" is a name for an ionic compound) exist in water solutions as separated ions. ... problem, but you may certainly consult your textbook (pages 112-113) or other references if you find it helpful.

The Nine-Bottle Challenge

Reactions for Net Ionic Equations for Experiment 9, The Nine Bottle Problem Chemistry 110 Fall 2004 Dr. Mahler

Reactions for Net Ionic Equations for Experiment 9

The 14 Bottle Problem Working with other students in a small group, you are to determine the identity of 14 aqueous solutions containing relatively common laboratory chemicals. Each bottle contains only one compound (other than water), and each bottle contains a different compound (no duplicates, although some anions repeat).

The 14 Bottle Problem - Chariho Regional School District

Best Answer: You have at least made an effort , but unfortunately most of what you have done is not correct . What you have presented is an old well known problem usually called the (dreaded) 9 solution problem. The idea is for students to try and anticipate what will happen when the different solutions are mixed .
