I started reading the Sugar Solutions Book and tried putting some of the principles to practice while reading. The control over my glucose started with in two days.

## **Sugar Solution - Diet Review**

Solutions can be measured by weight, volume or a combination of the two, but the most common is weight per volume. Unless instructions specify otherwise, you can usually assume that a 20 percent sugar solution means 20g of sugar, a measurement of weight, for every 100 milliliters of water, a measure of volume, especially if you're mixing the solution for use in biology or physiology.

Additionally, sugar tends not to release H or OH ions when it dissolves in water, so it does not alter the acidic or alkaline properties of the solution. In other words, sugar cannot materially alter the pH level of a solution, so the pH value of a sugar solution is the same as the pH level of the water without the added sugar.

## **What Is the PH of a Sugar Solution? | Sciencing**

As you keep adding sugar, you will notice that a point will be reached where no more sugar can dissolve. The solvent, water, cannot hold any more of the sugar in solution. This solution is now said to be saturated. A saturated solution is one in which the solution cannot possibly dissolve more solute under the existing conditions.

Terminology review: Controls . Water plus Benedict's reagent is a negative control for the sugar test. It demonstrates a negative test result (no sugar present). See tube 1 above. Glucose plus Benedict's reagent is a positive control for the sugar test. It demonstrates what a strong positive result should look like.

**Lab Review - Northern Kentucky University**

[Maria here. Because of all the hype around sugar I had to address the major claims about the benefits of a no sugar diet. While it is true that many of us consume too much added sugar, and we'd be much better off cutting down on the amount we consume, this does not necessarily justify jumping all the way to the other side - a no sugar diet.
