The Palaeolithic or old Stone Age lasted from 2.7 million years ago to around 20,000 to 10,000 years ago. A number of distinct groups of humans lived during this period but only our ancestor Homo sapiens has survived. During this time men were hunter gatherers, finding food from their local environment and moving from site to site depending on the season.

Are you keen to help your children cement the math skills they're learning, but finding them less than willing to spend their free time practising times tables or number bonds? Hopefully, you've had a chance to look around here at Maths Insider to see some of my suggestions for ways to make math practice more fun.

Maths Tips From Maths Insider | Quick tips and practical advice to help you guide your child to maths success

The Vikings wanted new land because the places where they came from in Scandinavia – Norway, Sweden and Denmark – weren't very easy to live on. It was hard to grow crops, which meant there wasn't a lot of food as the population got bigger. Britain and Europe had plenty of good farmland, so the Vikings tried to claim some of that land for themselves.

John Hattie developed a way of synthesizing various influences in different meta-analyses according to their effect size (Cohen's d). In his ground-breaking study "Visible Learning" he ranked 138 influences that are related to learning outcomes from very positive effects to very negative effects. Hattie found that the average effect size of all the interventions he studied was 0.40.

Hattie effect size list - 256 Influences Related To Achievement

TOI was the first to report this anomaly on Thursday. The probe also said to have found the board guilty as they failed to do their homework before giving the contract to Globarena.
