### **Ride the Rock Cycle Name complete this worksheet.**

Easier - Rocks are hard natural materials of mineral origin. Different kinds of rocks make up the crust of our planet Earth. Harder - A rock is defined as an aggregate of mineral grains, which means that rocks are a bunch of mineral grains all stuck together. The mineral grains may be large enough to be seen with the naked eye (phaneritic) or microscopic (aphanitic).

When you hold an igneous rock, the rock you hold in your hand is one of the oldest things in the world. Igneous rocks are formed from lava, magma or ash from a volcanic eruption or flow. Igneous rocks have distinctive properties that can help you distinguish them from other types of rocks, and identify the specific type of igneous rock you have.

Here you will do an assessment made from past SATs paper questions. You will be tested from level 3 to level 7. Questions will get harder as you go through the paper.

### **14 End of Topic Test - Qatar Science**

Like water, rocks, too, have their own cycle. This activity will teach students about the rock cycle and the process of change that rocks undergo.

### **The Rock Cycle: StudyJams! Science | Scholastic.com**

Density. Unusual density is one of meteorites' more characteristic features. It's not enough to say your rock is heavy. Density is how heavy a rock is for its size or compared with other rocks. Iron meteorites are 3.5 times as heavy as ordinary Earth rocks of the same size, while stony meteorites are about 1.5 times as heavy.

### **Meteorite Museum - University of New Mexico**

Sedimentary Rocks. Let's learn some facts about Sedimentary Rocks! At the end of the article, review our quiz sheet in the activity section to test what you have learned.

### **Sedimentary Rocks Facts For Kids | Cool Kid Facts**

Earth is the dynamic planet that we call home. It formed over 4.5 billion years ago, and it has been changing ever since. Sometimes these changes happen very fast, like an earthquake or a volcanic eruption.
