Dry brushing is one of the absolute best things that you can do for the largest organ of your body -- the skin. In fact, dry brushing may help diminish the appearance of cellulite, aid in removing toxins from the body and promote toned and supple skin, advises Ann Louise Gittleman, author of "The Fat Flush Fitness Plan."

Fat removal procedures are used mostly in cosmetic surgery to remove unwanted adipose tissue. The procedure may be invasive, as with liposuction, or noninvasive using laser therapy, radiofrequency, ultrasound or cold (cryoablation) to reduce fat, sometimes in combination with injections.. Fat is sometimes removed from one location to another on a person in an autograft, such as in some breast ...

Heredity - It is believed that acne development or attack runs in the family due to genetics though this still has to be verified by experts. Food - Excess oil, chemicals and preservatives, and other elements present or mixed in food can cause or trigger acne attacks. Eating nuts and oily food are said to be major contributors in having acne but experts have to still verify this.
