Alternatives to general relativity are physical theories that attempt to describe the phenomenon of gravitation in competition to Einstein's theory of general relativity.. There have been many different attempts at constructing an ideal theory of gravity. These attempts can be split into four broad categories:

Nicotinamide adenine dinucleotide (NAD) is a cofactor found in all living cells. The compound is called a dinucleotide because it consists of two nucleotides joined through their phosphate groups. One nucleotide contains an adenine nucleobase and the other nicotinamide. Nicotinamide adenine dinucleotide exists in two forms: an oxidized and reduced form, abbreviated as NAD<sup>+</sup> and NADH respectively.

Background. The B-complex is an officially recognized grouping of eight essential vitamins. Some sources dispute that number, claiming that there are in fact nine or ten (or more) vitamins within the B-complex, yet within most official, academic, and scientific circles, the number is generally accepted as eight, and these are:

Play is essential to development because it contributes to the cognitive, physical, social, and emotional well-being of children and youth. Play also offers an ideal opportunity for parents to engage fully with their children. Despite the benefits derived from play for both children and parents, time for free play has been markedly reduced for some children.
