Biology chapter 18 classification study guide answers

Modern-Evolutionary-Classification - 18.2 Modern... Evolutionary Classification Phylogeny: the study of evolutionary relationships among organisms, Darwin gave rise to this study. Biologists now group organisms into categories that represent lines of evolutionary descent, or phylogeny, not just physical similarities.

Modern-Evolutionary-Classification - 18.2 Modern ...

Modern evolutionary classification uses a method called cladistic analysis to determine how clades are related to one another. This information is used to link clades together into a cladogram, which illustrates how groups of organisms are related to one another by showing how evolutionary lines, or lineages, branched off from common ancestors.
