Nutrition is the science that interprets the interaction of nutrients and other substances in food in relation to maintenance, growth, reproduction, health and disease of an organism. It includes food intake, absorption, assimilation, biosynthesis, catabolism, and excretion. The diet of an organism is what it eats, which is largely determined by the availability and palatability of foods.

Nutrition - Wikipedia

Animal Breeding: Objective and Methods of Animal Breeding! Meaning: A group of animals related by descent and similar in most characters like general appearance, features, size, configuration, etc. are said to belong to a ‘breed’.
