The planning. In all research, it is essential to begin by clarifying what the researcher wants to find out, from whom and how. The purpose may be of a descriptive or exploratory nature based on inductive or deductive reasoning. Inductive reasoning is the process of developing conclusions from collected data by weaving together new information into theories.

How to plan and perform a qualitative study using content ...

How is it used? A semen analysis is used to determine whether a man might be infertile-unable to get a woman pregnant. The semen analysis consists of a series of tests that evaluate the quality and quantity of the sperm as well as the semen, the fluid that contains them.

Abnormalities of magnesium levels, such as hypomagnesemia, can result in disturbances in nearly every organ system and can cause potentially fatal complications (eg, ventricular arrhythmia, coronary artery vasospasm, sudden death). Despite the well-recognized importance of magnesium, low and high levels have been documented in ill patients, a...

Hypomagnesemia Treatment & Management: Approach ...

Symptomatic patients with methemoglobinemia or those with a significantly elevated methemoglobin level should be admitted to the hospital. A lower threshold for hospital admission should occur for patients with complicating factors, such as underlying anemia, chronic cardiopulmonary disease, or peripheral vascular disease. The specific symptoms determine the level of care that is needed.

Methemoglobinemia Treatment & Management: Approach ...

Child sexual abuse, also called child molestation, is a form of child abuse in which an adult or older adolescent uses a child for sexual stimulation. Forms of child sexual abuse include engaging in sexual activities with a child (whether by asking or pressuring, or by other means), indecent exposure (of the genitals, female nipples, etc.), child grooming, child sexual exploitation or using a ...
