What is science? Science is the concerted human effort to understand, or to understand better, the history of the natural world and how the natural world works, with observable physical evidence as the basis of that understanding 1. It is done through observation of natural phenomena, and/or through experimentation that tries to simulate natural processes under controlled conditions.

Information entropy is the average rate at which information is produced by a stochastic source of data.. The measure of information entropy associated with each possible data value is the negative logarithm of the probability mass function for the value:  $= - \sum$  . When the data source produces a low-probability value (i.e., when a low-probability event occurs), the event carries more ...

By Debkumar Mitra. It does not get any bigger than this in science. Compact massive objects in space with giant gravitational muscles that can even make light bend — black holes — that were, till the other day a mathematical artifact and ‘visible’ only in artists’ impressions, became, last Wednesday, a real photograph projected on a giant screen.

Comments: Dear Dan, Thanks for your article on Terence McKenna's Time-Wave Theory. There's more to discuss. I met Terence on the Big Island in July 1988 at a Physical Immortality Conference before he was very well known, but nonetheless a dynamic and inspiring, extremely articulate and compelling speaker.
