The History of Air Conditioning - There have been many attempts throughout history to avoid the ravages of heat and to keep cool in the hot summer months. From the simplicity of shade to architecture designed to take advantage of natural ventilation human history is ripe with methods to keep cool. Only in the last 100 years has man developed machinery that will allow for him to do more that ...

Air Conditioning & Heating History

Modern air conditioning emerged from advances in chemistry during the 19th century, and the first large-scale electrical air conditioning was invented and used in 1902 by US inventor Willis Carrier. The introduction of residential air conditioning in the 1920s helped enable the great migration to the Sun Belt in the United States. [citation needed] In 1758, Benjamin Franklin and John Hadley, a ...

When put under pressure, plastic crystals of neopentylglycol yield huge cooling effects - enough that they are competitive with conventional coolants. In addition, the material is inexpensive, widely available and functions at close to room temperature. Details are published in the journal Nature Communications.

Green material for refrigeration identified | University ...

Never use mechanical heating and cooling as a substitute for good design. However, for existing homes, installation of high efficiency heating and cooling technologies, with modest building improvements and behaviour change, may be cheaper options to reduce energy bills and greenhouse gas emissions than major home renovations.
