Nervous System Yahoo Answers

The primary parts of the nervous system are the brain, the spinal cord and nerves. Therefore, there isn't a specific vitamin per se that has a direct effect on these parts - and obviously none would have a negative effect. The capillaries in your blood are what nourish these parts of the nervous system.

Nervous system? | Yahoo Answers

describe the transmission of an impulse along the length of neuron. include the ion distribution along the neural membrane, as well as a description of how the impulse travels in a wave of depolarization. that question is on one of my old bio tests, and the answer i have in my notes only got me 1/5. i'd ask my teacher but my exam is tomorrow.

Describe. but i can't think of anything else important..what are some good questions for this thnx

nervous system? | Yahoo Answers

Best Answer: The nervous system is the part of an animal's body that coordinates the voluntary and involuntary actions of the animal and transmits signals between different parts of its body. In most types of animals it consists of two main parts, the central nervous system (CNS) and the peripheral nervous system (PNS). The CNS contains the brain and spinal cord.

what is nervous system? | Yahoo Answers

The autonomic nervous system (ANS) is the part of the nervous system that is not under conscious control. It is commonly divided into two usually antagonistic subsystems: the sympathetic and parasympathetic nervous system, and involves the homeostasis of organs and basic physiological functions.

Autonomic Nervous System? | Yahoo Answers

Yahoo India Answers ... First, our best science to date shows that plants lack any semblance of a central nervous system or any other system design for such complex capacities as that of conscious suffering from felt pain. Second, plants simply have no evolutionary need to feel pain. Animals being mobile would benefit from the ability to sense ...

Is it true that plants have nervous ... - in.answers.yahoo.com

Best Answer: 2. axons 3. neuroglial cells 4. myelin 5. involuntary 9. midbrain 10. brain stem 11. cerebellum 12. regulation 13. occipital lobe (listed twice), parietal lobe A little hard to do just looking at it, but those should be correct!

Nervous system concept map? | Yahoo Answers

A.Somatic Nervous System - is d answer Explanation- The somatic nervous system, or voluntary nervous system, enables humans to react consciously to environmental changes. It includes 31 pairs of spinal nerves and 12 pairs of cranial nerves. This system controls movements of skeletal (voluntary) muscles.

Voluntary muscles are controlled by the _____ nervous ...

O god I am so confused!!.. PLEASE help! So I have three questions: 1) I learnt that the

parasympathetic and sympathetic nervous system form part of the autonomic nervous system which in turn forms part of the peripheral nervous system. Now, since the peripheral nervous system deals with all nerves which are not found in the brain or spinal cord, why is my textbook telling me that the PNS uses ...

Sympathetic and Parasympathetic nervous systems? | Yahoo ...

Best Answer: 3a/b: When it is hot outside (nervous detects) the blood vessels in the dermis dilate to cool off. When cold, blood vessels constrict to conserve heat. They also work when there is an injury (more often an open wound). The nervous system may detect pain or an injury which will send a ...
