Hans Selye [] first popularized the concept of "stress" in the 1950s. Selye theorized that all individuals respond to all types of threatening situations in the same manner, and he called this the General Adaptation Syndrome (GAS). He claimed that, in addition to SNS arousal, other bodily systems such as the adrenal cortex and pituitary gland may be involved in a response to threat.

Comparative psychology refers to the scientific study of the behavior and mental processes of non-human animals, especially as these relate to the phylogenetic history, adaptive significance, and development of behavior. Research in this area addresses many different issues, uses many different methods and explores the behavior of many different species from insects to primates.

Comparative psychology - Wikipedia

Compliance refers to a response—specifically, a submission—made in reaction to a request. The request may be explicit (e.g., foot-in-the-door technique) or implicit (e.g., advertising). The target may or may not recognize that he or she is being urged to act in a particular way. Social psychology is centered on the idea of social influence. Defined as the effect that the words, actions, or ...
