Darwinism is a theory of biological evolution developed by the English naturalist Charles Darwin (1809–1882) and others, stating that all species of organisms arise and develop through the natural selection of small, inherited variations that increase the individual's ability to compete, survive, and reproduce. Also called Darwinian theory, it originally included the broad concepts of ...

Sociological Aspects of Music Psychology Human beings are not meant to live in isolation. Our complex mammalian nature, along with a host of other emotional, physical and spiritual drives, cause us to form groups. The smallest social unit is the family, which spawns larger groups, communities, and finally nations.
