Higher Human Biology - Kirkwall Grammar School

Mitosis is the way in which any cell (plant or animal) divides when an organism is:.. growing; repairing a damaged part of its body; replacing worn out cells; Growth means getting bigger. An individual cell can grow a certain amount, but not indefinitely. Once a cell gets to a certain size, it becomes difficult for all parts of the cell to obtain oxygen and nutrients by division.

Mitosis and Meiosis - Biology Notes for IGCSE 2014

Multiple choice questions are perhaps the easiest to complete - you simply put a cross in a box - however, the questions often have two answers that could, at first glance, be correct. Don't make ...

Auxins are plant growth substances, produced by the shoot and root tips of growing plants. - Auxins in the shoot → stimulate cell growth, by the absorption of water. - Auxins in the root → slow down the cell growth.

Auxins - Biology Notes for IGCSE 2014

Biology is the "science of life." It is the study of living and once-living things, from submicroscopic structures in single-celled organisms to entire ecosystems with billions of interacting organisms; it further ranges in time focus from a single metabolic reaction inside a cell to the life history of one individual and on to the course of many species over eons of time.

Molecular Biology and Phylogeny "The Cytochrome-C" Lab . Beth Kramer ENSI 1992. Middle School Version by Karin Westerling (ENSI 1992) EVOLUTION. Classification

Lesson: Molecular Biology & Phylogeny

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.

Biology with Lab - Easy Peasy All-in-One High School

DNA from the Beginning is organized around key concepts. The science behind each concept is explained by: animation, image gallery, video interviews, problem, biographies, and links.

JSTOR is a digital library of academic journals, books, and primary sources.

JSTOR: Viewing Subject: Biological Sciences

In biology, the active site is the region of an enzyme where substrate molecules bind and undergo a chemical reaction. The active site consists of residues that form temporary bonds with the substrate (binding site) and residues that catalyse a reaction of that substrate (catalytic site). Although the active site is small relative to the whole volume of the enzyme (it only occupies 10~20% of the ...
