As for what OP refers to as "machine name" or "computer name" this answer is incorrect. Java has no way to obtain the "computer name", i.e. the name assigned to the computer early on in the boot process and unrelated to network.

environment - Java current machine name and logged in user ...

Are you sure both are using the same java executable? Also, I think you can limit memory available to a specific user, if you do ulimit -a as the user, does it say a limit for max memory size? – matt freake Mar 27 '12 at 14:23
