χ^2 (chi squared) - This is just the name of the analysis. Σ - This is an operator that says to sum all the values to the right. o - These are values you measure or observe.

A.P. Biology - phsgirard.org

Mitosis is the process that a somatic cell divides into two daughter cells. It is an important process in normal organism development. Meiosis is the type of cell division by which germ cells (eggs and sperm) are produced. Meiosis involves a reduction in the amount of genetic material. Both types of cell division have similar phases: prophase, prometaphase, metaphase, anaphase and telophase.

Natural Sciences CLEP - A Free Study Guide Resource! Exam Description: The Natural Sciences CLEP covers the material you would normally see in introductory courses in Biology and Physical Sciences.

Natural Sciences CLEP Free Study Guide! - Free-Clep-Prep.com

There are many types of cells. In biology class, you will usually work with plant-like cells and animal-like cells. We say "animal-like" because an animal type of cell could be anything from a tiny microorganism to a nerve cell in your brain. Biology classes often take out a microscope and look at single-celled microbes from pond water.

Biology CLEP - A free study guide resource! Areas of Study. I'm still experimenting with the best way to cover the needed material.

Biology CLEP - Free-Clep-Prep.com

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...
