Fossilization and the bodies of organisms. The bodies of most (but not all) organisms are made from a variety of different types of tissues. These range from soft tissues like those that make up skin and internal organs to hardened materials like bones and shells that provide an animal with either internal (skeleton) or external (shell) support.

Indigo dye is an organic compound with a distinctive blue color (see indigo).Historically, indigo was a natural dye extracted from the leaves of certain plants, and this process was important economically because blue dyes were once rare. A large percentage of indigo dye produced today, several thousand tonnes each year, is synthetic.It is the blue often associated with denim cloth and blue jeans
