In mathematics, monstrous moonshine, or moonshine theory, is the unexpected connection between the monster group  $M$  and modular functions, in particular, the  $j$  function. The term was coined by John Conway and Simon P. Norton in 1979.. It is now known that lying behind monstrous moonshine is a vertex operator algebra called the moonshine module (or monster vertex algebra) constructed by Igor ...

\* For this calculation, the quadratic formula was used. If one makes the simplifying assumption that  $x$  is small relative to  $[HCOOH]$ , the calculated value of  $[H^+]$  is 0.0013 M. Although a weak acid dissociates only slightly in water, the soluble salt of a weak acid (for example, sodium formate) is a strong electrolyte and dissociates completely.

In this section we introduce the method of undetermined coefficients to find particular solutions to nonhomogeneous differential equation. We work a wide variety of examples illustrating the many guidelines for making the initial guess of the form of the particular solution that is needed for the method.

<sup>1</sup>Formerly, an apostrophe was used after a final -s. However, new rules simplify forming genitives. Most genitives are formed with ' s.. The term "genitive" includes a larger range of relationships than "possessive"—ownership (my dog), temporary possession (his cookie), a natural trait (his tail), a family relationship (his mom), origin (his city), performer of an action (his arrival), and more.

### **Apostrophes | Grammar Quizzes**

@IanDunn I would agree with you in a general SSH client situation, but given that the OP clearly states that he's encountering this problem while running scripts the alternative is breaking the script every time the host key changes (and there are a number of reasons why that might be the case) which the answer you referred to doesn't resolve.
