In chemistry, a solution is a special type of homogeneous mixture composed of two or more substances. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent. The mixing process of a solution happens at a scale where the effects of chemical polarity are involved, resulting in interactions that are specific to solvation.

At a certain composition of the mixture, a homogenous polymer solution may separate into two phases as the temperature crosses a certain point, which corresponds to the demixing temperature ( $T_{dem}$ ). This temperature can be measured by various techniques, including calorimetric and optical methods.

In chemistry, pH (/ p iː ˈ eɪ tʃ /) is a scale used to specify how acidic or basic a water-based solution is. Acidic solutions have a lower pH, while basic solutions have a higher pH. At room temperature (25 °C), pure water is neither acidic nor basic and has a pH of 7. The pH scale is logarithmic and approximates the negative of the base 10 logarithm of the molar concentration (measured ...

### pH - Wikipedia

Chemistry A mixture in which particles of one or more substances (the solute) are distributed uniformly throughout another substance (the solvent), so that the mixture is homogeneous at the molecular or ionic level. The particles in a solution are smaller than those in either a colloid or a suspension. Compare colloid suspension.

Introduction to pH : General Information. pH in an aqueous solutions is a measure of hydrogen and hydroxide ions. Water molecules dissociate in hydrogen ( $H^+$ ) and hydroxide ( $OH^-$ ) ions,  $H_2O = H^+ + OH^-$ . but the number of ions formed is very small.

Bases are the chemical opposite of acids. Acids are defined as compounds that donate a hydrogen ion ( $H^+$ ) to another compound (called a base). Traditionally, an acid (from the Latin acidus or acere meaning sour) was any chemical compound that, when dissolved in water, gives a solution with a hydrogen ion activity greater than in pure water, i.e. a pH less than 7.0.
