Operations management is an area of management concerned with designing and controlling the process of production and redesigning business operations in the production of goods or services. It involves the responsibility of ensuring that business operations are efficient in terms of using as few resources as needed and effective in terms of meeting customer requirements.

Operations management - Wikipedia

Key management refers to management of cryptographic keys in a cryptosystem. This includes dealing with the generation, exchange, storage, use, crypto-shredding (destruction) and replacement of keys. It includes cryptographic protocol design, key servers, user procedures, and other relevant protocols.. Key management concerns keys at the user level, either between users or systems.

Times and durations. Time perception and time management inside the two models are quite different. Project time is definite — a long or short period — but with time constraints; each project

has a definite beginning and a definite ending, its best geometric and suggestive representation is a segment. Durations are proportional to the length of the segments that represent activities.
