Evolutionary Trade-offs. While there are many factors that can affect allele proportions in a population, selection is thought to be among the most powerful. Selection effectively shapes the heritable physiology, morphology, and behaviors of populations through differential reproduction among individuals.

### **Selection - Virtual Biology Lab**

Natural Selection Virtual Lab. The individuals with the positive mutation would be able to reproduce and pass their ability to stay hydrated for a long period of time to their offspring. 4. Scientists have discovered by looking at fossil records that the ancestors of giraffes had shorter necks than giraffes today.

### **natural selection virtual lab | Mutation (3.4K views)**

A humorous but powerful tool for simulating evolution. Watch a trait evolve and experiment with the effects of mutation rate and the strength of selection. This activity shows all the steps of natural selection in entertaining style, but generates real simulation data that can be exported or printed.

### **Evolution Lab - Biology in Motion**

Explore natural selection by controlling the environment and causing mutations in bunnies.

### **Natural Selection - Evolution | Genetics - PhET ...**

Introduction: Charles Darwin accumulated a tremendous collection of facts to support the theory of evolution by natural selection. One of his difficulties in demonstrating the theory, however, was the lack of an example of evolution over a short period of time, which could be observed as it was taking place in nature.

### **Peppered Moth Simulation - The Biology Corner**

Topics Covered: Natural selection, variation, adaptation, selective pressures, evolution, directional selection, stabilizing selection, disruptive/diversifying selection, fitness, etc. Check out the worksheet that goes along with the game (courtesy of Mrs. Theresa Hartz) ...
