APICS magazine | July/August 2011 35 As illustrated in Figure 3, when supply and demand are relatively stable—that is, when standard deviations of demand and lead time are low—fill rate will tend to be higher than cycle service level.

Determining appropriate inventory levels is one of the most important and most challenging tasks CraCK - MIT - Massachusetts Institute of Technology

Audience analysis is a task that is often performed by technical writers in a project's early stages. It consists of assessing the audience to make sure the information provided to them is at the appropriate level. The audience is often referred to as the end-user, and all communications need to be targeted towards the defined audience. Defining an audience requires the consideration of many ...
