Summary: When you have a set of (x,y) data points and want to find the best equation to describe them, you are performing a regression. You will learn how to find the strength of the association between your two variables (correlation coefficient), and how to find the line of best fit (least squares regression line).. Usually you have some idea that your x variable can help predict your y ...

For long-term success in school, business and life, learning HOW to think is far more important than learning WHAT to think.. Yet rather than serve as the core of any education worthy of a rational human being, we have relegated the teaching of logic, argument analysis and critical reasoning to specialty courses in universities that reach too few students, too late in their education.
