I had to send them away. They were children not born of me; they came rushing out between some other woman's legs, one right after the other, and I was told she lost so much of her liquid that, as soon as they squealed in the air, she had dried up, all broken apart, and pieces of her blew away with the gust of their father's grief.

Product teams have been repeating the MVP (Minimum Viable Product) mantra for a decade now, without re-evaluating whether it's the right way to maximize learning while pleasing the customer. Well, it's not the best system. It's selfish and it hurts customers. We don't build MVPs at WP Engine. This is the right way.

I hate MVPs. So do your customers. Make it SLC instead.

She dreamed about her nameless baby. It was always the same dream, always in the hospital. She would wake up in bed because she heard crying. The little bassinet was always placed right near her, the crying growing louder and louder with each passing second, and April would look inside, her chest full of joy at the prospect of seeing her daughter.

Occasionally, we grammar enthusiasts need to take a step back and lighten up a little bit. While there are some grammar rules that are hard and fast (I'm looking at you, comma splice), sometimes there is wiggle room (like the controversial claim that you can split infinitives). Today, we're tackling another wiggly rule: is ending a sentence with a preposition okay?

A Fistful of Monads. When we first talked about functors, we saw that they were a useful concept for values that can be mapped over. Then, we took that concept one step further by introducing applicative functors, which allow us to view values of certain data types as values with contexts and use normal functions on those values while preserving the meaning of those contexts.
