Nbme 6 Answers And Explanations

The clues for trichotillomania were the death of her grandmother suddenly, since trichotillomania is often stress-induced. I also narrowed it down by it saying the hair was in different growth stages in the patchy areas, which makes sense if she's plucking them out at different times.

NBME Answers and Explanations

Don't forget that incidence is the number of new cases which emerge in an unaffected population. Incidence is trying to get at the question -> "In a given year, how many new people develop this disease?" In other words, you cannot count people who already have the disease. You have to exclude those people from your calculation.

This is a controversial one, but it seems the consensus is that pt had sxs of major depression, and thus his libido was most likely down. But structurally/blood flow-wise, he was fine, so nocturnal erections were normal. So, concept NBME wants us to realize is that we should screen for depression in pts who complain of sexual dysfunction?
