Stock splits are events that increase the number of shares outstanding and reduce the par or stated value per share. For example, a 2-for-1 stock split would double the number of shares outstanding and halve the par value per share. Existing shareholders would see their shareholdings double in quantity, but there would be no change in the proportional ownership represented by the shares (i.e ...

The knowledge economy is the use of knowledge (savoir, savoir-faire, savoir-être) to generate tangible and intangible values. Technology, and in particular, knowledge technology, helps to incorporate part of human knowledge into machines. This knowledge can be used by decision support systems in various fields to generate economic value.

Quality management ensures that an organization, product or service is consistent. It has four main components: quality planning, quality assurance, quality control and quality improvement. Quality management is focused not only on product and service quality, but also on the means to achieve it. Quality management, therefore, uses quality assurance and control of processes as well as products ...
