The young of some birds learn to communicate vocally by social learning, imitating their parents, as well as the dominant birds of their flock. Lacking vocal cords, birds are thought to make tones and sounds using throat muscles and membranes – the syrinx in particular. There are likely to be limitations on the sounds that birds can mimic due to differences in anatomical structures, such as ...

Travelling along the mountains near the village, a pile of glowing dirt clumps caught my attention. I bent down to get a closer look - I thought that I was needing a pair of spectacles - when I felt the heat arise from the ground... The town was destroyed by the lava that encompassed the valley, but all the people were saved thanks to my, finally useful, fervid actions.
