In chemistry, specific rotation ($[\alpha]$) is a property of a chiral chemical compound.: 244 It is defined as the change in orientation of monochromatic plane-polarized light, per unit distance-concentration product, as the light passes through a sample of a compound in solution.: 2-65 Compounds which rotate the plane of polarization of a beam of plane polarized light clockwise are said to be ...

Specific rotation - Wikipedia

Abiogenesis, or informally the origin of life, is the natural process by which life has arisen from non-living matter, such as simple organic compounds. While the details of this process are still unknown, the prevailing scientific hypothesis is that the transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular ...

Abiogenesis - Wikipedia

However, with sterically hindered Grignard reagents, the reaction may proceed by single-electron transfer.. Grignard reactions will not work if water is present; water causes the reagent to rapidly decompose. So, most Grignard reactions occur in solvents such as anhydrous diethyl ether or tetrahydrofuran (THF), because the oxygen in these solvents stabilizes the magnesium reagent.

Waksman, Selman Humus (1936) . The basic text on the topic for decades; a summary of everything known in the mid 1930s. Waksman, Selman A. Principles of Soil Microbiology (1927) . Waksman's massive work of scholarship was refused by many publishers who thought there was no market for such a book, but it became a best-seller and dominated the field for decades.
