Statistics is a branch of mathematics working with data collection, organization, analysis, interpretation and presentation. In applying statistics to, for example, a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model process to be studied. Populations can be diverse topics such as "all people living in a country" or ...

The Birth of Probability and Statistics The original idea of "statistics" was the collection of information about and for the "state". The word statistics derives directly, not from any classical Greek or Latin roots, but from the Italian word for state.. The birth of statistics occurred in mid-17 th century. A commoner, named John Graunt, who was a native of London, began reviewing a weekly ...
