Amphetamine was first synthesized in 1887 in Germany by Romanian chemist, Lazăr Edeleanu, who named the drug phenylisopropylamine. This concoction was one of a series of compounds related to the plant derivative ephedrine, which had been isolated from the plant má huáng (ephedra) that same year by Nagayoshi Nagai. Shortly after the first synthesis of amphetamine, Nagai synthesized ...

History and culture of substituted amphetamines - Wikipedia

Content . Multiplication and division are related arithmetic operations and arise out of everyday experiences. For example, if every member of a family of 7 people eats 5 biscuits, we can calculate 7×5 to work out how many biscuits are eaten altogether or we can count by 'fives', counting one group of five for each person.

Learning is the process of acquiring new, or modifying existing, knowledge, behaviors, skills, values, or preferences. The ability to learn is possessed by humans, animals, and some machines; there is also evidence for some kind of learning in some plants. Some learning is immediate, induced by a single event (e.g. being burned by a hot stove), but much skill and knowledge accumulates from ...
