### **Thinking and problem solving in psychology math**

Computational thinking is a problem-solving process in which the last step is expressing the solution so that it can be executed on a computer. However, before we are able to write a program to implement an algorithm, we must understand what the computer is capable of doing -- in particular, how it executes instructions and how it uses data.

### **Computational Thinking for Problem Solving | Coursera**

Develop mathematical thinking and communications skills Part I - 2. Every course should incorporate activities that will help all students progress in developing analytical, critical reasoning, problem-solving, and communication skills and acquiring mathematical habits of mind.
