Mathematical Physics aims at a mathematically rigorous understanding of complex phenomena in nature. The program is particularly concerned with quantum effects and, in particular, with the theory of Schroedinger's equation. Both classical one-body Schroedinger operator theory (including topics like semi-classical analysis, eigenvalue inequalities, Anderson localization, non-selfadjoint ...

I'm beginning to suspect that there are actually (at least) two different theoretical HEP physicists named Nima Arkani-Hamed out there. One of them (who I'll call Nima1) believes the way to understand the fundamental nature of physical reality involves extremely complicated extensions of the Standard Model, with large numbers of parameters tuned to avoid conflict with observation, and ...

Both the General GRE and the Physics Subject Test GRE are required for admittance into a Ph.D. or Master's Degree program for physics. The General GRE is offered all year long and the Physics GRE is offered only in April, September, and October. Most physics majors take the Physics GRE September or October of their senior year. Students can register for either test by going to the GRE website.
