The Helical Structures Forum (HSF) is an international club with purpose for discussion and promotion of advanced scientific knowledge about the physical structures in the nature from micro to macro scale. HSF endorses a new approach for study of natural phenomena in different fields of physics. The principles of real objectivity, causality and logical understanding are strongly observed.

Zero-point energy (ZPE) is the difference between the lowest possible energy that a quantum mechanical system may have, and the classical minimum energy of the system. Unlike in classical mechanics, quantum systems constantly fluctuate in their lowest energy state due to the Heisenberg uncertainty principle. As well as atoms and molecules, the empty space of the vacuum has these properties.

There is a large overlap of the world of static electricity and the everyday world that you experience. Clothes tumble in the dryer and cling together. You walk across the carpeting to exit a room and receive a door knob shock. You pull a wool sweater off at the end of the day and see sparks of ...

This data would indicate that the discharge is slower in an accumulator than in the air, as Reich supports. However, after doing the last run, it suddenly occurred to the writer that perhaps the fact that in every run, the electroscope was first discharged in the air and then discharged in the accumulator might have had some effect on the results. The electroscope was then taken out of the ...

Scientific understanding of any kind of radiation effects starts from the primary damage, i.e. the defects that are produced right after an initial atomic displacement event initiated by a high-energy particle. In this Review, we consider the extensive experimental and computer simulation studies that have been performed over the past several decades on what the nature of the primary damage is.
