Industrial automation & machinery companies are turning to Model-Based Design to overcome complex challenges to develop embedded applications that integrate with mechanical, electrical, control, and signal processing systems.

Industrial Automation and Machinery - MATLAB & Simulink ...

A cellular automaton is a collection of "colored" cells on a grid of specified shape that evolves through a number of discrete time steps according to a set of rules based on the states of neighboring cells. The rules are then applied iteratively for as many time steps as desired. von Neumann was one of the first people to consider such a model, and incorporated a cellular model into his ...
