In computer science, binary search, also known as half-interval search, logarithmic search, or binary chop, is a search algorithm that finds the position of a target value within a sorted array. Binary search compares the target value to the middle element of the array. If they are not equal, the half in which the target cannot lie is eliminated and the search continues on the remaining half ...

The Vision of the Department of Electronics and Communication Engineering, National Institute of Technology Silchar is to be a model of excellence for undergraduate and post graduate education and research in the country.

E.C.E. Dept. | NIT Silchar

There is an abundance of literature on the subject of autoerotic fatalities. Unfortunately, the largest portion of the early literature, circa. 1970, is terribly subjective and interpretive of morality (note: much of the early literature is still footnoted and built upon). However, some excellent work on the subject has been done since then.

Mathematics and art are related in a variety of ways. Mathematics has itself been described as an art motivated by beauty. Mathematics can be discerned in arts such as music, dance, painting, architecture, sculpture, and textiles. This article focuses, however, on mathematics in the visual arts. Mathematics and art have a long historical relationship.
