Supply-side economics is a macroeconomic theory arguing that economic growth can be most effectively created by lowering taxes and decreasing regulation, by which it is directly opposed to demand-side economics. According to supply-side economics, consumers will then benefit from a greater supply of goods and services at lower prices and employment will increase.

The parameters  $\theta$  and  $\psi$  capture the return to education and  $\eta$  is the return to experience (learning on the job). For  $\psi > 0$  there are decreasing return to education. The marginal return to education is given by  $\theta s - \psi$ . Later on, we consider variation of  $\theta$  in order to investigate the impact of the return to education on education, health behavior, and health outcomes.
