NO\$Zoomer - Special full-featured magnifier addon for NO ...

Actual GB resolution would be almost microscopic on the Pandora Screen! Same with GBA, you can keep the correct Aspect Ratio, but still have it almost fill the screen, just with a small amount of border either side. EDIT: If the graphics look a little 'soft' when scaled up, disable any filtering. GBA looks pin sharp that way in Gpsp.

Like you said, it's open source. Someone with interest and knowledge should just make their own version based on what have been done already. I did understand that higher internal resolution wouldn't be high priority earlier as it would've taken time from other crucial features (like said wifi) but now that it's already done it seems silly indeed.
